

# CERTIFICATE OF ACCREDITATION

**The ANSI National Accreditation Board**

Hereby attests that

**SP Metrology System (Thailand) Co., Ltd.**  
**69/29 Moo 1 T.Klongsi A.Klongluang**  
**Pathumthani, Thailand 12120**

Fulfills the requirements of

**ISO/IEC 17025:2017**

In the fields of

**CALIBRATION and DIMENSIONAL MEASUREMENT**

This certificate is valid only when accompanied by a current scope of accreditation document.  
The current scope of accreditation can be verified at [www.anab.org](http://www.anab.org).

Jason Stine, Vice President

Expiry Date: 16 May 2026  
Certificate Number: ACT-2050

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017.  
This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory  
quality management system (refer to joint ISO-ILAC-IAF Communiqué dated April 2017).

## SCOPE OF ACCREDITATION TO ISO/IEC 17025:2017

### SP Metrology System (Thailand) Co., Ltd.

69/29 Moo 1 T.Klongsi A.Klongluang  
Pathumthani, Thailand 12120  
Sombut Srikampa +662-193-2220  
spmetro.md@gmail.com [www.sp-cal.com](http://www.sp-cal.com)

## CALIBRATION AND DIMENSIONAL MEASUREMENT

Valid to: May 16, 2026

Certificate Number: ACT-2050

### CALIBRATION

Calibration and Measurement Capability (CMC) is expressed in terms of the measurement parameter, measurement range, expanded uncertainty of measurement and reference standard, method, and/or equipment. The expanded uncertainty of measurement is expressed as the standard uncertainty of the measurement multiplied by a coverage factor of 2 ( $k=2$ ), corresponding to a confidence level of approximately 95%.

Notes:

1. On-site calibration service is available for this parameter, since on-site conditions are typically more variable than those in the laboratory, larger measurement uncertainties are expected on-site than what is reported on the accredited scope.
2. Nominal Values listed as approximate.
3.  $f$  = frequency in Hz; " = arc-second; GU = Gloss Units; rpm = revolutions per minute.
4. Mismatch Uncertainty is based on DUT SWR: 1.4 for < 2 GHz; 1.6 for < 18 GHz.
5. Unitless parameter.
6. This scope is formatted as part of a single document including Certificate of Accreditation No. ACT-2050.

Jason Stine, Vice President
