QUALITY PRODUCTION PROCESS

with modern machinery

- State-of-the-art machinery enhances quality production capacity

- Production of foam packaging for a variety of industries

- Custom made EPE anti-scratch foam

- Produce Foam mat and foam carpet

3D INTER PACK

Company Limited

EPE FOAM MANUFACTURER

‘EPE cushioning foam’

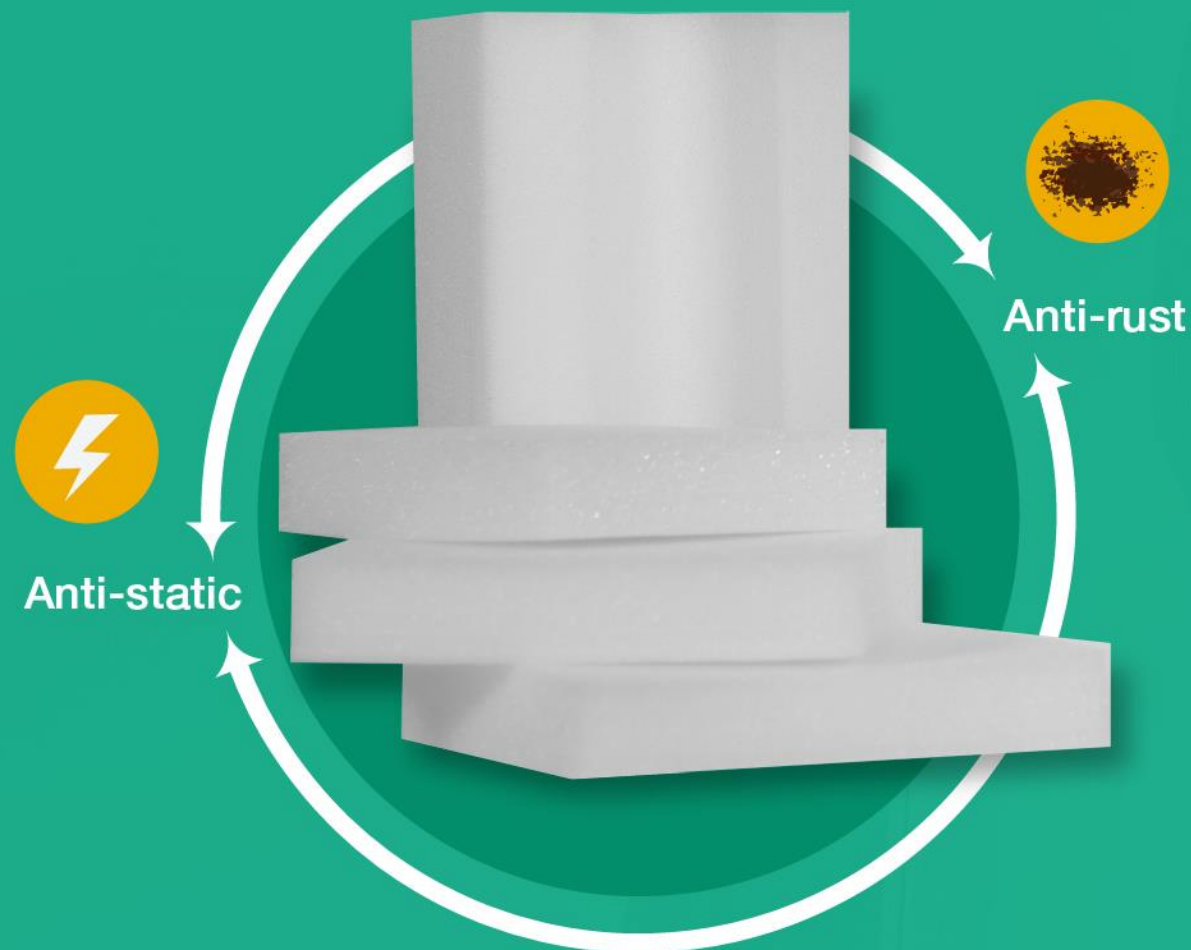

It is another choice that many industries use because of its soft, pliable product. It can protect the product from being scratched from abrasion or damaged by impact. EPE foam is slightly dust and moisture resistant and can also be custom molded, saving more than other foam moldings for maximum benefit at an economical price.

EPE foam manufacturer

In respond to increasing demand,

We are able to produce foam cushioning with anti-static and anti-rust additives by using the principle of releasing anti-rusting molecules in the form of odorless, colorless, and harmless vapors of this molecule. It will be coated on the encapsulated metal surface and interfere with the rusting process.

EPE FOAM

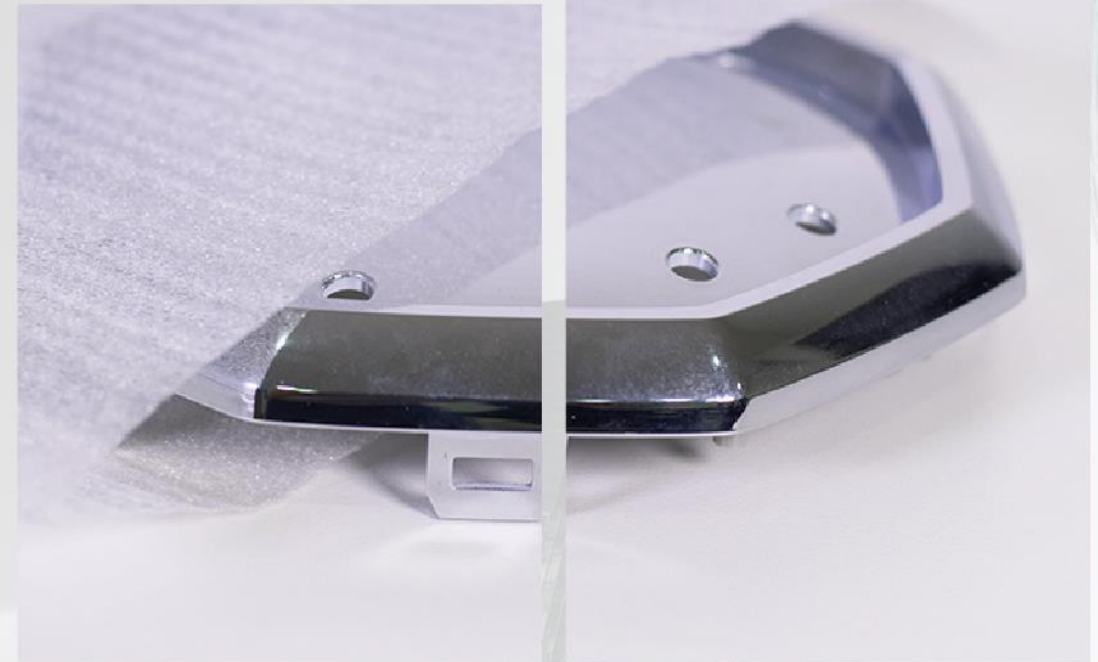

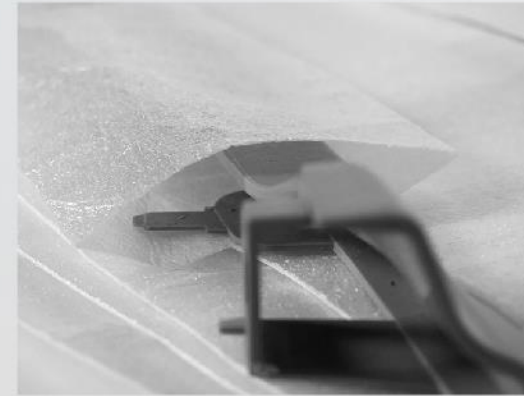

Cushioning packaging foam

CUSHIONING FOAM

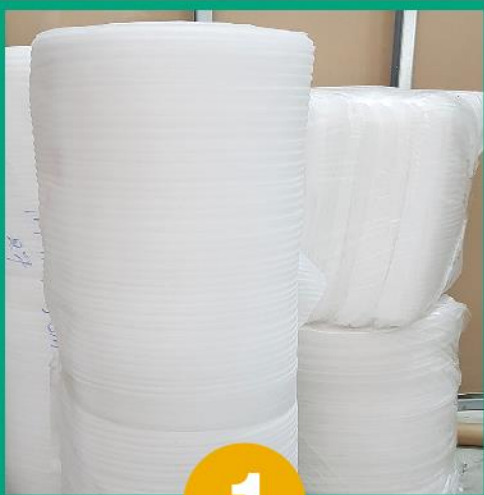

Made from polyethylene to be used for wrapping products or making bags for packing products, does not cause wrinkles, is a thin white sheet with soft texture, high flexibility.

Features and Applications

- ✔ to prevent the product from being damaged in transportation
- ✔ to wrap the product for delivery
- ✔ to make the product look classy
- ✔ to protect the product from scratches
- ✔ to prevent friction
- ✔ To increase convenience and economy in transportation because EPE foam is lightweight

EPE FOAM can be divided into 4 types

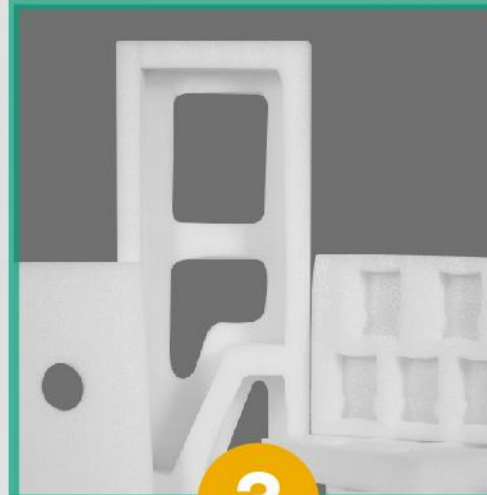

1

EPE foam
Roll

2

EPE foam
Sheet

3

EPE foam
Partition

4

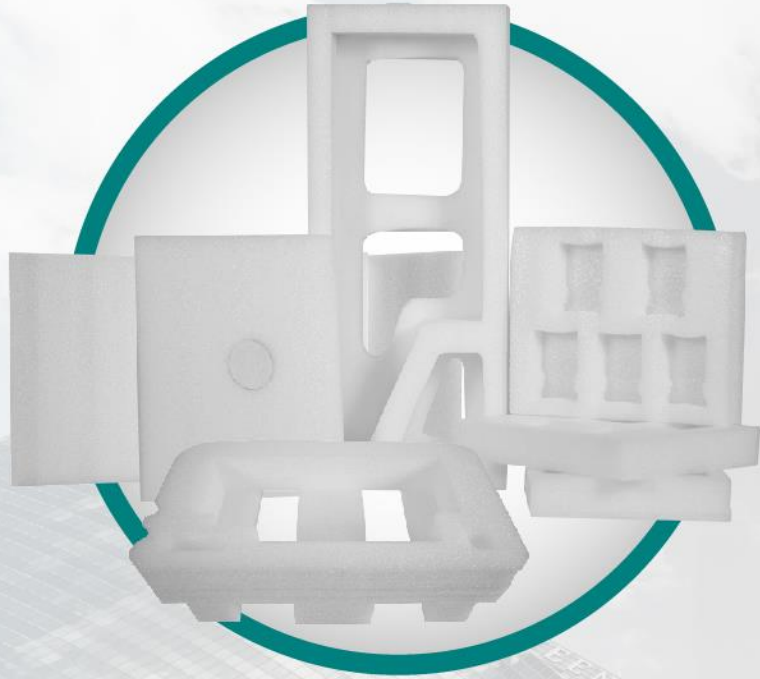

EPE foam
Block
