Simple to install, yet **powerful** enough to meet any requirement.

Fire, emergency communications, mass notification, general signaling, and voice evacuation systems all provide opportunities for growth. But to grow your business in this market, you need an audible visible (AV) line simple enough to install quickly in large installations, yet powerful enough to meet any application requirement.

SpectrAlert® Advance does just that.

The only AV products with plug-in designs, aesthetic and functional consistency, and field-adjustable settings across the entire line, SpectrAlert Advance enables you to meet the widest range of notification requirements and specifications in the industry.

With SpectrAlert Advance, you can take on any project with confidence, knowing you can meet requirements while maximizing the efficiencies of using a single product line. Whether for massive emergency communications projects, small notification systems, or anything in between, SpectrAlert Advance products, tools, and accessories simplify the entire user experience – from planning and selection to training, installation and maintenance – saving you time and money while protecting the lives of your customers.

See inside why SpectrAlert Advance is a market leader in AV notification.

HERMEL

We offer a **complete** AV line that meets your every need.

If you specify SpectrAlert® Advance, you'll benefit from the simplicity that comes with the widest and most consistent line of AV notification appliances in the industry. SpectrAlert Advance includes a full range of indoor, outdoor, wall, and ceiling products for a wide variety of notification projects. Common features across the line include field-selectable candela settings, plug-in designs, rotary code switches, universal mounting plates, and the same current draw on wall- and ceiling-mount devices.

These attractive devices are designed with the architect in mind. All SpectrAlert Advance devices have the same family look and can be interchanged seamlessly within a building. Unique accessories, like the weatherproof mounting plate, make outdoor devices blend with any exterior façade.

The breadth and consistency of the SpectrAlert Advance line are further enhanced by features that increase versatility. For example, plain models can be customized with field-applied decals and color lens strobe attachments for a variety of applications.

System Sensor also provides tools that simplify the specification of code-compliant systems. You can learn more about these tools at systemsensor.com/tools.

Versatile Devices Fit Any Application or Market

SpectrAlert Advance provides the versatility that specifiers need to meet requirements for a range of notification applications – from fire to mass notification to general signaling – using a single, uniform line of products.

Our field-applied decals (AGENT, EVAC, ALERT, FIRE) customize any plain AV device for unique applications. Used in conjunction with our color lenses (amber, red, blue, green), they can turn any strobe into an ECS, general signaling, weather warning, or agent release notification appliance with no light derating. That means the SpectrAlert Advance line makes it easy for you to expand your business into markets beyond fire.

Easily meet requirements with cost-effective design.

A high-quality notification system design serves as the foundation for any project, helping to guide installation and ensure relevant codes are met. SpectrAlert® Advance products and tools help make the design process cost-effective and efficient, so you can win bids and ultimately save time and money on the entire project.

First, SpectrAlert Advance products and accessories provide the breadth and versatility for you to meet virtually any requirement for indoor, outdoor, wall, or ceiling applications with a single, cohesive family of products.

In addition, a code-compliant AV system has many upfront calculations or requirements that can be complicated and time-consuming, such as calculating voltage drop on a circuit or obtaining documentation that needs to be included in a job file. System Sensor provides several online tools and software that can greatly simplify these processes.

Free Design Tools and Learning Resources

SpectrAlert Advance isn't just a line of notification appliances, it also includes a variety of free design tools and learning resources to help you efficiently design notification systems that meet code and save lives.

When designing a notification system, there are several tasks and calculations that can be tedious and time-consuming. System Sensor assists in this process by providing tools online at systemsensor.com/tools. Here, you can access free tools, such as the Voltage Drop Calculator and Mounting Options Tool, to simplify system design and product selection.

Other useful resources include the CAD download page at systemsensor.com/cad and the Engineering Specifications page at systemsensor.com/engspecs. These pages enable you to quickly download CAD files or engineering specifications for any System Sensor product. Simply click "GO" in the Document Center.

If it's training you're looking for, System Sensor online training, live and archived webinars, and seminars provide the latest information on meeting code and application requirements. These training resources can be accessed at systemsensor.com.

Finally, System Sensor provides several guides, case studies and white papers that include best practices on specific notification system applications.

Reduce the time and cost of installation and maintenance.

If you install notification systems, SpectrAlert® Advance greatly reduces the time and expense associated with installation, configuration and maintenance. That means you can win more bids, increase your margins, and take on more projects.

For example, SpectrAlert Advance provides aesthetic and functional consistency across its entire range of AV devices. Whether your project requires indoor, outdoor, wall, or ceiling appliances, you only need to learn one uniform product line. This approach reduces required training as well as potential confusion in the field.

Common SpectrAlert Advance features provide benefits beyond uniformity; they also provide exceptional time and cost benefits for your projects. First, all devices provide field-selectable settings and use a universal mounting plate for both wall and ceiling applications. The mounting plate is further enhanced with an onboard shorting spring that ensures wiring continuity before devices are installed, so you can verify that the loop is properly wired without mounting the devices and exposing them to potential construction damage.

Once the plates are mounted, all devices, including speakers and speaker strobes, utilize a plug-in design with a single captured screw to speed installation and virtually eliminate costly ground faults from crushed or pinched wires. In addition, if a device is damaged and needs to be replaced or its settings reconfigured, technicians simply loosen a single screw and unplug the device for replacement or adjustment.

Simple Installation Across the Entire Line

Whatever type of notification devices your project requires, SpectrAlert Advance provides a quick, easy, and uniform installation experience. Take our outdoor appliances. While this is the most extensive line of outdoor notification devices available, it maintains the look and feel of our indoor devices and all of the installation benefits – benefits that include mounting plates with onboard shorting springs, plug-in designs across the entire line (including speakers), and a preliminary snap-in feature with a single captured screw for quick and efficient device mounting.

SpectrAlert Advance outdoor devices also includes installation benefits designed specifically for outside environments. For example, NEMA 3R-rated weatherproof plates (WTP) make attractive watertight flush mounting to a variety of outdoor surfaces quick and easy. The plastic used on outdoor devices resist UV-induced fading longer than most devices on the market, so you don't have to sacrifice looks to meet safety requirements.

Finally, lightweight NEMA 4X-rated plastic weatherproof back boxes now ship with all outdoor devices to make for an easier installation. These new materials protect against corrosion and, like the device plastic, resist UV-induced fading. With removable mounting ears, these back boxes can be used with cages or other external device protection products to obtain a cleaner look.

Strobes

SpectrAlert Advance® Strobes

SpectrAlert Advance strobes – which are available in ceiling-mount or wall-mount varieties to meet a wide variety of applications – are ideal for warning hearing-impaired individuals during an emergency event. For convenient installation, the universal mounting plate with its snap-in feature holds the product in place for the screw attachment. Strobes feature 11 field-selectable candela settings and are compatible with 12- or 24-volt systems for a high level of customization. SpectrAlert Advance strobes are listed to UL 1971 for public mode evacuation. Please note that model numbers with a “K” suffix are outdoor-rated products listed to UL 1638 and rated from -40° F to 151° F (-40° C to 66° C), with a NEMA 4X rating. See page 16 for our line of plain strobes for ECS/MNS applications.

Ceiling-Mount Strobes

Location	Red Model No.	White Model No.	Candela	Marking	Description
Indoor	SCR	SCW	Standard	FIRE	Clear lens
	SCRH	SCWH	High	FIRE	Clear lens
Outdoor	SCRK	SCWK	Standard	FIRE	Clear lens
	SCRHK	SCWHK	High	FIRE	Clear lens

Wall-Mount Strobes

Location	Red Model No.	White Model No.	Candela	Marking	Description
Indoor	SR	SW	Standard	FIRE	Clear lens
	SR-SP	—	Standard	FUEGO	Clear lens
	SRH	SWH	High	FIRE	Clear lens
Outdoor	SRK	SWK	Standard	FIRE	Clear lens
	SRK-R	SWK-R	Standard	FIRE	Clear lens, Device only
	SRHK	SWHK	High	FIRE	Clear lens
	SRHK-R	—	High	FIRE	Clear lens, Device only

Notes:

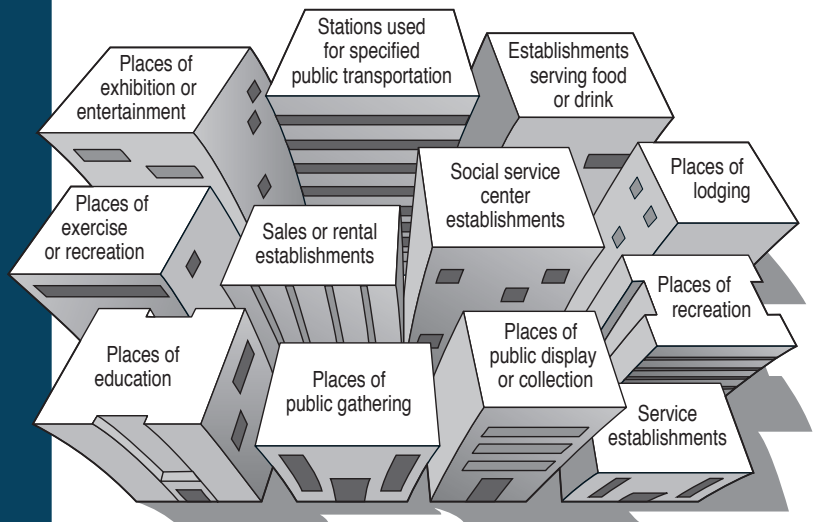

- Standard Candela settings: 15, 15/75, 30, 75, 95, 110, and 115
- High Candela settings: 135, 150, 177, and 185
- -SP denotes “FUEGO” printed housing.
- -R represents replacement device only, ships minus plastic weatherproof back box.
- -R outdoor replacement models are meant for use with WTP series of weatherproof flush-mount plates or SA-WBB outdoor metal weatherproof back boxes.

Private vs. Public Mode Notification

“**Private mode**” applications are those where a signal is known to be in place and where someone is trained to take additional action upon notification from the alarm signal. Examples include control rooms, nurses’ stations and guard desks. These emergency signaling applications may not have to meet ADA requirements and may be satisfied through installation of UL 1638 appliances.

“**Public mode**” operation includes audible or visible signaling to occupants or inhabitants of the area protected by the fire alarm system. The Americans with Disabilities Act, Section 301-7, defines a public accommodation as any facility that is privately operated, affects commerce with its operation, and falls into one of the 12 categories shown in the accompanying illustration. These categories are fairly general and will encompass a wide variety of facilities. Social service facilities, for example, include not only homeless shelters, adoption agencies, senior citizen centers, food banks and day care centers, but also halfway houses, substance abuse treatment facilities and other crisis centers.

Chimes and Chime Strobes

SpectrAlert Advance® Chimes

SpectrAlert Advance chimes were designed to produce a distinctive chime tone to meet UL 464 private mode applications for alerting trained personnel to investigate possible emergency situations and take appropriate actions. Devices feature rotary switches to select from a multitude of sound patterns and volume settings, and are compatible with 12- or 24-volt systems for additional customization. Using the shorting spring feature to provide instant feedback to ensure that wiring is properly connected – in conjunction with our plug-in design – simplifies the process and cuts install time. Chimes are also compatible with the System Sensor synchronization protocol.

Chimes

Location	Red Model No.	White Model No.	Description
Indoor	CHR	CHW	Chime with selectable chime tones and volume settings

SpectrAlert Advance® Chime Strobes

SpectrAlert Advance indoor chime strobes were designed to produce a distinctive chime tone to meet UL 464 and UL 1638 in private mode applications, when alerting trained personnel to investigate possible emergency situations and take appropriate actions. Using the shorting spring feature to provide instant feedback to ensure that wiring is properly connected – in conjunction with our plug-in design – simplifies the process and cuts install time. With 7 field-selectable candela settings and 12- or 24-volt operation in one device, chime strobes maximize profits and provide a high level of customization.

Mini-Horns and Horns

SpectrAlert Advance® Mini-Horns

The SpectrAlert Advance series of mini-horn sounders is ideal for providing primary and secondary signaling for fire and security applications such as hotel, motel, or residential fire system applications, or where smaller notification devices are desired. Mini-horns offer 2 volume settings, high or low, as well as temporal or non-temporal tones. Compatible with 12- or 24-volt systems. Mini-horns are compatible with the System Sensor synchronization protocol, and they can be mounted to single-gang back boxes for aesthetically pleasing applications.

Mini Horns

Location	Red Model No.	White Model No.	Description
Indoor	MHR	MHW	Mini Horn with two volume settings

SpectrAlert Advance® Horns

SpectrAlert Advance horns increase application flexibility for indoor or outdoor installations. Intended for full building notification as well as on the property ground, they produce a loud sound to notify occupants to evacuate the buildings. Installers can easily adapt devices to suit a wide range of application requirements by using field-selectable sound patterns and volume settings. Compatible with 12- or 24-volt systems. The universal mounting plate's plug-in design simplifies installation, too. SpectrAlert Advance horns are listed to UL 464 for public mode application, and "K" series outdoor products are listed to UL 464 for private mode applications and rated from -40° F to 151° F (-40° C to 66° C), with a NEMA 4X rating.

Wall-Mount Horns

Location	Red Model No.	White Model No.	Description

Notes:

- -R represents replacement device only, ships minus plastic weatherproof back box.
- -R outdoor replacement models are meant for use with WTP series of weatherproof flush-mount plates or SA-WBB outdoor metal weatherproof back boxes.

Horn Strobes

SpectrAlert Advance® Horn Strobes

SpectrAlert Advance horn strobes are rich with features guaranteed to cut installation time and maximize profits. Intended for full building notification as well as on the property ground, they produce a loud sound to notify occupants to evacuate the buildings; the strobe is intended to notify those that may have a hearing impairment. Features include a universal mounting plate with a preliminary snap-in feature to hold the product in place for the screw attachment, 11 field-selectable candela settings, and rotary switches to select horn tone and volume settings. Compatible with 12- or 24-volt systems. SpectrAlert Advance horn strobes are listed to UL 1971 and UL 464 for public mode evacuation. Model numbers with a “K” suffix are outdoor products that are listed to UL 1638 and UL 464 for private mode evacuation. The outdoor products are rated from -40° F to 151° F (-40° C to 66° C) and have a NEMA 4X rating.

Directional Sounders

SpectrAlert Advance® Directional Sounder

The ExitPoint Directional Sounder with Voice Messaging is a unique life safety product. It produces pulsating sound consisting of broadband low-, mid-, and high-range sound that helps occupants determine the location of the sound. When placed strategically within a building, they can lead building occupants to the nearest and safest exit or area of refuge, even in low-to-no visibility. Sounder can also play a recorded voice alert message in 15 different language combinations to instruct occupants what to do as they approach, which allows them to act quickly. It includes 4-speed selections and 5 power settings for 24-volt operation.

Low Frequency Sounders and Sounder Strobes

SpectrAlert Advance® Sounders

SpectrAlert Advance low frequency sounders are custom designed to meet the 520Hz low frequency requirements. Studies show that a lower frequency, centered around 520Hz, is the most ideal to awaken sleeping occupants, even those with mild to severe hearing loss. Their tamper-resistant construction and universal mounting plate with plug-in design provide durability and flexibility. Sounders also offer field-selectable settings – such as a rotary switch for the low frequency tones in 3 sound patterns – and are compatible with 12- or 24 volt systems. Devices come enabled with System Sensor synchronization protocol.

Low Frequency Sounders

Indoor	HR-LF	HW-LF	Low Frequency 520 Hz

SpectrAlert Advance® Sounder Strobes

SpectrAlert Advance low frequency sounder strobes are custom designed to meet the 520Hz low frequency requirements while providing visual notification requirements. Studies show that a lower frequency, centered around 520Hz, is the most ideal to awaken sleeping occupants, even those with mild to severe hearing loss. Sounders offer field-selectable candela settings, as well as a rotary switch for the low frequency tone's 2 sound patterns. Their tamper-resistant construction, 24-volt operation, and universal mounting plate with plug-in design provide durability and flexibility.

Notes:
 • -LF denotes low frequency 520 Hz sound

NFPA 72® 2010 and 2013
 Low Frequency Code

SpectrAlert Advance® Low Frequency Sounders and Sounder Strobes meet the NFPA 72®: 2010/2013 low frequency requirements for all commercial and certain residential sleeping spaces. Studies driving these requirements have shown that a lower frequency is more effective at waking individuals in a fire event, including those with mild to severe hearing loss.

Speakers

SpectrAlert Advance® Speakers

Dual-voltage (25/70.7 Vrms) evacuation speakers were designed for fast installation and top performance in noisy environments. The low total harmonic distortion of the SP speaker offers high fidelity sound output, while the SPV speaker offers high-volume sound output for use in high-ambient noise applications. Evacuation speakers also feature a plug-in design for reducing ground faults. The outdoor models ship with a plastic outdoor back box, featuring removable side flanges and improved saltwater corrosion resistance. Model numbers with a “K” suffix are outdoor rated products that are listed to UL 1480 and rated from -40° F to 151° F (-40° C to 66° C), with a NEMA 4X rating.

- -R outdoor replacement models are meant for use with WTP series of weatherproof flush-mount plates or MWBB outdoor metal weatherproof back boxes.

Voice Evacuation Design Information

A word about speaker output ratings from listing agencies:

On many speaker data sheets, there are two speaker output ratings provided. One is referred to as reverberant and the other is anechoic. In the US, Underwriters Laboratories uses a reverberant chamber to test speakers. A reverberant chamber is a specially constructed room with walls that have almost no sound absorption. Since the walls are so highly reflective of sound waves, the sound energy distribution in the room is very uniform. When designing systems for UL compliance, the sound output measured using the reverberant method should be used.

Underwriters Laboratories of Canada takes just the opposite approach and uses an anechoic chamber. An anechoic chamber has almost no sound reflection. This chamber produces a different result in the speaker specification. When designing systems for ULC compliance, the sound output measured with the anechoic method should be used.

Speaker Strobes

SpectrAlert Advance® Speaker Strobes

During an emergency, building occupants and those on property grounds need to quickly understand what is happening and what actions to take. SpectrAlert Advance speaker strobes transmit the clear, intelligible messages and visible notification necessary to meet code, save lives, and protect property. In addition, selectable-output speaker strobes offer many features to reduce ground faults and simplify installation. Rotary switches allow installers to select voltage and power, and the 11 field-selectable candela settings accommodate any application. Low total harmonic distortion of the SP series provides high fidelity sound output while the SPV speakers offer high volume output, making them ideal for use in high-ambient noise environments. The plug-in design and universal mounting plate provides additional flexibility. Model numbers with a “K” suffix are outdoor rated products that are listed to UL 1971 and UL 1480 and are rated from -40° F to 151° F (-40° C to 66° C), with a NEMA 4X rating. The outdoor models ship with the plastic outdoor back box.

Plain Speaker Strobes and Strobes

SpectrAlert Advance® Plain Speaker Strobes

During an emergency, building occupants and those on property grounds need to quickly understand what is happening and what actions to take. SpectrAlert Advance speaker strobes transmit the clear, intelligible messages and visual notification necessary to meet code, save lives, and protect property. Installation is simplified, too. Plain speaker strobes feature rotary switches for voltage and power settings, 11 field-selectable candela settings, and adjustable high fidelity or high volume speakers. The universal mounting plate with a plug-in design virtually eliminates costly ground faults. SpectrAlert Advance Speakers are listed to UL 1480 and the clear strobes are listed to UL 1971. Compatible with our colored lenses to provide distinctive visual signaling. Model numbers with a “K” suffix are outdoor rated products that are listed to UL 1638 and UL 1480 and are rated from -40° F to 151° F (-40° C to 66° C) and have a NEMA 4X rating. The outdoor models ship with the plastic outdoor back box.

SpectrAlert Advance® Plain Strobes

SpectrAlert Advance plain strobes were designed to reduce installation time and meet a wide variety of Mass Notification and Emergency Communication applications. SpectrAlert Advance clear strobes are listed to UL 1971 for public mode evacuation. Compatible with our colored lenses to provide distinctive visual signaling. Model numbers with a “K” suffix are outdoor rated products that are listed to UL 1638 and rated from -40° F to 151° F (-40° C to 66° C) and have a NEMA 4X rating.

- * Compatible with DECAL-R and DECAL-RC for white devices (red letters) and DECAL-W or DECAL-WC for red devices (white letters).

Emergency Communication Devices

Alert Devices for Emergency Communication Systems

ALERT-printed devices include all the time and cost-saving benefits of the rest of the SpectrAlert Advance line, while also meeting NFPA Chapter 24 and UFC strobe requirements. Amber lens strobes are listed to UL 1638 for private mode applications. Clear lens strobes are listed to UL 1971 for public mode evacuation and are compatible with colored lenses and decal kits. Speaker meets UL 1480.

Model numbers with a “K” are outdoor rated products that are listed to UL 1480 and UL 1638 and rated from -40° F to 151° F (-40° C to 66° C), with a NEMA 4X rating.

Dual Strobe Expander Plates for Emergency Communications

The SpectrAlert Advance Dual Strobe and Dual Strobe with Speaker Expander Plates provide lower costs and improve aesthetics by performing the functions of 2-3 devices for emergency communication systems. Devices are compatible with 12- or 24-volt systems and come enabled with System Sensor synchronization protocol. Please note that the amber lens strobe is listed to UL 1638 for private mode applications, and the clear lens strobe is listed to UL 1971 for public mode applications. The clear lens strobes are compatible with colored lenses for UL 1638 private mode applications.

- -P suffix denotes plain housing (no “FIRE” print)

Audible Visible Accessories

SpectrAlert Advance devices can be adapted to nearly any application with the appropriate accessory. Our mounting options allow our strobes, speakers, horns, chimes, and strobe combinations to be placed in new or existing construction with professional results.

Back Boxes

Mounting	Red Model No.	White Model No.	Description
Ceiling	SBBCR	SBBCW	Surface-mount back box for ceiling-mount horns, strobes, horn strobes, speakers, and speaker strobes
	SA-WBBC	SA-WBBCW	Metal outdoor back box for ceiling-mount horns, strobes, and horn strobes
	—	MWBBCW	Metal weatherproof back box for speakers and speaker strobes
Wall	SBBR	SBBW	Surface-mount back box for wall-mount horns, strobes, and horn strobes
	SBBSPR	SBBSPW	Surface-mount back box for wall-mount speakers and speaker strobes
	SA-WBB	SA-WBBW	Metal outdoor back box for wall-mount horns, strobes, and horn strobes
	MWBB	MWBBW	Metal outdoor back box for speakers and speaker strobes

Back Box Skirts

Mounting	White Model No.	Description
Wall	BBS-SP201W	Wall-mount back box skirt for ExitPoint Directional Sounder
	SEP-BBSW	Strobe expander plate back box skirt for Dual Strobe Expander Plates
	SPSEP-BBSW	Speaker strobe expander plate back box skirt for Dual Strobe Expander Plates

Colored Lenses - For use with plain (non-FIRE marked) strobe devices.

Ceiling Model No.	Wall Model No.	Color	Description
LENS-AC	LENS-A	Amber	Lens attachment for all SpectrAlert Advance plain (non-FIRE marked) indoor or outdoor, ceiling- or wall-mounted strobes
LENS-BC	LENS-B	Blue	
LENS-GC	LENS-G	Green	
LENS-RC	LENS-R	Red	

Decal Kits - For use with plain (non-FIRE marked) devices.

Mounting	Model No.	Color	Description
Ceiling	DECAL-RC	Red Letters	60 decals* for up to 5 white devices (3 decals are required per device)
	DECAL-WC	White Letters	60 decals* for up to 5 red devices (3 decals are required per device)
Wall	DECAL-R	Red Letters	40 decals* for up to 5 white devices (2 decals are required per device)
	DECAL-W	White Letters	40 decals* for up to 5 red devices (2 decals are required per device)

*All decals include labels "AGENT, EVAC, ALERT and FIRE" for up to 5 devices.

Mounting Plates

Red Model No.	White Model No.	Description
MP120K	—	Indoor/Outdoor 120 VAC adapter mounting plate for use with SpectrAlert Advance horns, strobes, 2-wire horn strobes, chimes and chime strobes

Retrofit Plates

Red Model No.	White Model No.	Description
RFP	RFPW	Retrofit plate for SpectrAlert Advance devices

Watertight Plates

Red Model No.	White Model No.	Description
WTP	WTPW	Weatherproof plate for flush mounting outdoor horns, strobes, and horn strobes
WTP-SP	WTP-SPW	Weatherproof plate for flushing mounting outdoor speakers and speaker strobes

Sync-Circuit Module

Red Model No.	White Model No.	Description
MDL3R	MDL3W	12 and 24 V sync-circuit module

Trim Rings

Mounting	Red Model No.	White Model No.	Description
Ceiling	TRC	TRCW	Trim ring for SpectrAlert Advance speakers and speaker strobes
Wall	TR	TRW	Trim ring for SpectrAlert Advance speakers and speaker strobes
	TR-HS	—	Trim ring for SpectrAlert Advance horns, strobes, and horn strobes

Specifications and Ratings

Note 1: Sound output data peak dB measured in ULC anechoic room at 10 feet.

Note 2: Sound output measured in a reverberant room at 10 feet.

Low Frequency Sounder Current Draw (mA) for H-LF Series:

Position	Sound Pattern	8–17.5 Volts		16–33 Volts	
		DC	FWR	DC	FWR
1	Temporal	191	262	138	166
2	Continuous	292	384	138	208
3	Coded	292	388	153	205

NOTE: In position 3, temporal coding must be provided by the NAC. If the NAC voltage is held constant, the sounder output will remain constantly on. Coded ratings provided are for continuous voltage. Position 3 is not available on 2-wire low frequency sounder/strobe products.

Low Frequency Sounder Output (dBA) in Reverberant (UL**) and Anechoic Room:

Switch Position	Sound Pattern	8–17.5 Volts**		16–33 Volts**		24 V Nominal Measurements			
		DC	FWR	DC	FWR	Reverberant		Anechoic	
						DC	FWR	DC	FWR
1	Temporal	76	76	76	76	76	76	86	86
2	Continuous	80	80	80	80	80	80	90	90
3*	Coded	80	80	80	80	80	80	90	90

*Sounder ratings provided are for continuous voltage as provided by the NAC.

** Minimum dB rating for Operational Voltage Range as per UL 464.

Low Frequency Sounder/Strobe Current Draw (mA) for P2H-LF High Candela Range Series:

Sound Pattern	16–33 Volts DC				16–33 Volts FWR			
	135 cd	150 cd	177 cd	185 cd	135 cd	150 cd	177 cd	185 cd

Specifications

Standard Operating Temperature

32°F to 120°F (0°C to 49°C)

K Series Operating Temperature

-40°F to 151°F (-40°C to 66°C)

Humidity Range

10% to 93% non-condensing (indoor products)

Strobe Flash Rate

1 flash per second

Nominal Voltage

Regulated 12 DC/FWR or regulated 24 DC/FWR¹

Operating Voltage Range²

8 V to 17.5 V (12 V nominal) or 16 V to 33 V (24 V nominal)

Input Terminal Wire Gauge

12 AWG to 18 AWG

Ceiling-Mount Dimensions (including lens)

6.8 in Dia. × 2.5 in H (173 mm Dia. × 64 mm H)

Wall-Mount Dimensions (including lens)

5.6 in L × 4.7 in W × 2.5 in D (142 mm L × 119 mm W × 64 mm D)

Horn Dimensions

5.6 in L × 4.7 in W × 1.3 in D (142 mm L × 119 mm W × 33 mm D)

Mini-Horn Dimensions

4.6 in L × 2.9 in W × .45 in D (117 mm L × 74 mm W × 11.5 mm D)

Wall Weatherproof Back Box Dimensions

5.7 in L × 5.1 in W × 2.0 in D (145 mm L × 130 mm W × 51 mm D)

Notes:

1. Full Wave Rectified (FWR) voltage is an unfiltered, time-varying power source that is used on some power supply and panel outputs.
2. P, S, PC, and SC products will operate at 12 V nominal only for 15 and 15/75 cd.
3. To calculate current draw for 4-wire horn strobes, combine horn and strobe current draws from the tables at left.

Founded in 1984, System Sensor is a global manufacturer of fire and life safety devices, specializing in smoke detection, carbon monoxide detection, and notification technology. System Sensor develops products for real-world applications worldwide. With sales, service, and manufacturing facilities throughout the Americas, Europe, and Asia, System Sensor places a premium on research and development to provide the most reliable, innovative, and comprehensive line of products in the industry.
