

CBLE

**Steam or Hot Water
Firetube Boiler
50 to 800 HP**

A Cleaver-Brooks
Sustainable Solution

Sustainable for the Environment, Strategic for Your Bottom Line

The CBLE is designed and manufactured for reliability and long life, delivering high-efficiency, low-emissions control worldwide.

The CBLE is the result of 70 years of firetube boiler engineering experience, and our commitment to the four cornerstones of successful plant operation: ***Safety, Efficiency, Reliability and Sustainability.***

The CBLE firetube boiler:

- » Achieves emissions reduction goals down to <5 ppm NOx with the integral burner design
- » Can burn more types of renewable fuels than others in the market to meet emissions reduction and decarbonization goals
- » Offers a proven history of reliability and safety, providing a low lifecycle cost

The CBLE boiler meets the strict performance and sustainability criteria required to earn the Cleaver-Brooks Sustainability Seal.

The Most Reliable Boiler Ever

Dependable Construction

The CBLE is the most robust and reliable pressure vessel on the market. A 4-pass firetube boiler with 5 square feet of heating surface per boiler horsepower will provide years of efficient, trouble-free operation.

Fuel Flexibility

The result of years of experience, our pressure vessel and smooth bore tube designs, combined with the industry-leading integral burner and advanced Hawk Control, enable Cleaver-Brooks to deliver guaranteed performance while firing a variety of alternate fuels—more than any manufacturer.

Peace of Mind

Our complete packaged boilers provide the burner, boiler, and controls as a single, engineered solution. Based on a design that Cleaver-Brooks has refined for decades, these boilers operate at peak efficiency and are more reliable than any other.

The quality, durability and serviceability of Cleaver-Brooks is unmatched.

Scott Roman, HVAC Engineer
Rockville General Hospital

Hawk Integrated Controls System

The Hawk Control, which serves as the brain of the CBLE model, enables you to run your boiler safely and efficiently.

- » Completely integrated boiler/burner control is fully tested during development
- » Automatically tunes boiler for changes in environmental conditions
- » Combustion air fan vibration monitoring
- » Linkageless control eliminates single-point control hysteresis
- » Optional VSD control reduces fan horsepower load
- » Advanced emissions controls with NOx trim option
- » Unlimited options for system customization and optimization
- » NFPA and UL® compliant for maximum safety
 - Return-to-pilot functionality for immediate ignition
 - Hawk water-level control, draft control, third fuel option
 - Integrated deaerator and main panel controls

Industry-Leading Interface

The Hawk is the most powerful boiler control system available in the industry. Its user-friendly interface features:

- » Highest-resolution screen on the market
- » Intuitive navigation
- » Built-in maintenance manual
- » E-mail and text alerts

Prometha® IoT-Connected Boiler Solutions

Prometha collects critical data and provides actionable insights, making boiler optimization and troubleshooting simple.

With Prometha, you can:

- » Access boiler insights from anywhere, 24/7/365
- » Increase operational efficiency
- » Lower total cost of ownership
- » Prevent or reduce unplanned downtime

Integral Burner Technology

Our experienced team of highly qualified engineers developed the integral burner. This burner design provides years of reliable operation with minimal moving parts and is easy to retrofit if fuel or emissions requirements change.

50 to 800 HP Integral Burner

- » High efficiency
- » Quiet operation
- » Small footprint
- » Easy to maintain and install
- » Retrofit options available
- » Ability to burn a variety of fuels

Lowering Emissions

Minimizing emissions is entirely dependent upon proper burner design and compatible furnace geometry. The CBLE boiler offers NO_x reduction options of less than 70 ppm NO_x when burning #2 oil and less than 60, 30, 9 to less than 5 ppm NO_x when burning natural gas.

Cleaver-Brooks integral burners are matched and tested with the boiler, allowing us to guarantee the lowest possible NO_x performance.

A History of Innovation

Integral burner released with "CB" model firetube

1953

10:1 high turndown burner introduced

CBLE (low emissions) 30 and 60 ppm NO_x burners introduced

1988

1991

2003

NTI 9 ppm NO_x burner launched

Hawk launched with single-point positioning and display

2004

Hawk adds base and intermediate levels

2008

NTI 5 and 7 ppm NO_x burners available

2010

2016

LNO burner, 5 ppm NO_x with 3% O₂, launched

Waterback or Dryback Configurations

The CBLE is offered in either a 4-pass waterback or dryback design, both of which come with an integral burner. This boiler package is designed for:

- » Long life
- » Highest fuel-to-steam/ water efficiency
- » Fuel flexibility
- » Maximum safety
- » Lowest emissions
- » Quiet operation
- » Ease of maintenance
- » Flexibility to add desired options to further enhance the package

Waterback

- » Longest service life
- » Fully watercooled design reduces stress due to cycling
- » Little to no refractory in rear door
- » Requires front tube pull

Dryback

- » Simple vessel design
- » Easy tube access for inspection, cleaning, plugging, re-rolling
- » Tube pull front or back
- » No confined space

Versatile Vessel Design

The CBLE vessel is engineered for long service life, and the furnace and tube design are ideal for alternative fuels.

Reliable and Consistent Manufacturing

As a single-source provider, we control the manufacturing process of the burner, boiler, and controls, delivering consistency, reliability, and repeatability in all products.

We enjoy the fact that we have the most reliable and efficient boilers. We're so pleased that we're planning to add another.

Jacob Nagib
Director of Engineering and Construction
Halifax Medical Center

Proven Reliability and Performance

Decades of experience and evolution

Design engineering and manufacturing excellence are key reasons for the extended life of a Cleaver-Brooks firetube boiler. With over 100,000 units in the field, the average life exceeds 40 years and, in many cases, surpasses 60 years! Therefore, reliability should not be considered an intangible, especially when a single downtime occurrence can result in a production loss that far exceeds the cost of the boiler. The CBLE is the most ruggedly designed, efficient and reliable boiler on the market today.

Industry Leading Boiler — Backed by Cleaver-Brooks

Only Cleaver-Brooks can offer the performance guarantees and enhanced warranties on every CBLE boiler, because we design, manufacture, and test every part of every boiler to our exacting standards.

Performance Guarantee:

- » Efficiency
- » Emissions
- » Steam Quality
- » Turndown

Enhanced Warranties:

- » Integral Burner

Take Optimization to the Limit

Cleaver-Brooks complete system integration produces the most efficient, reliable solutions in the world. Our systems offer a lifetime of trouble-free service, because they are designed, engineered, manufactured, integrated and serviced by one company. Contact your local Cleaver-Brooks representative for information on options and accessories.

Advanced Controls

- » Hawk boiler controls
- » Prometha® IoT Solutions
- » Advanced deaerator controls
- » Main panel

Exhaust Solutions

- » Draft calculations and design
- » Single-source solution
- » UL-listed products

Stack Economizers

- » Non-condensing
- » C2X-HE – 94% efficient
- » Condensing

High-Pressure Condensate Systems

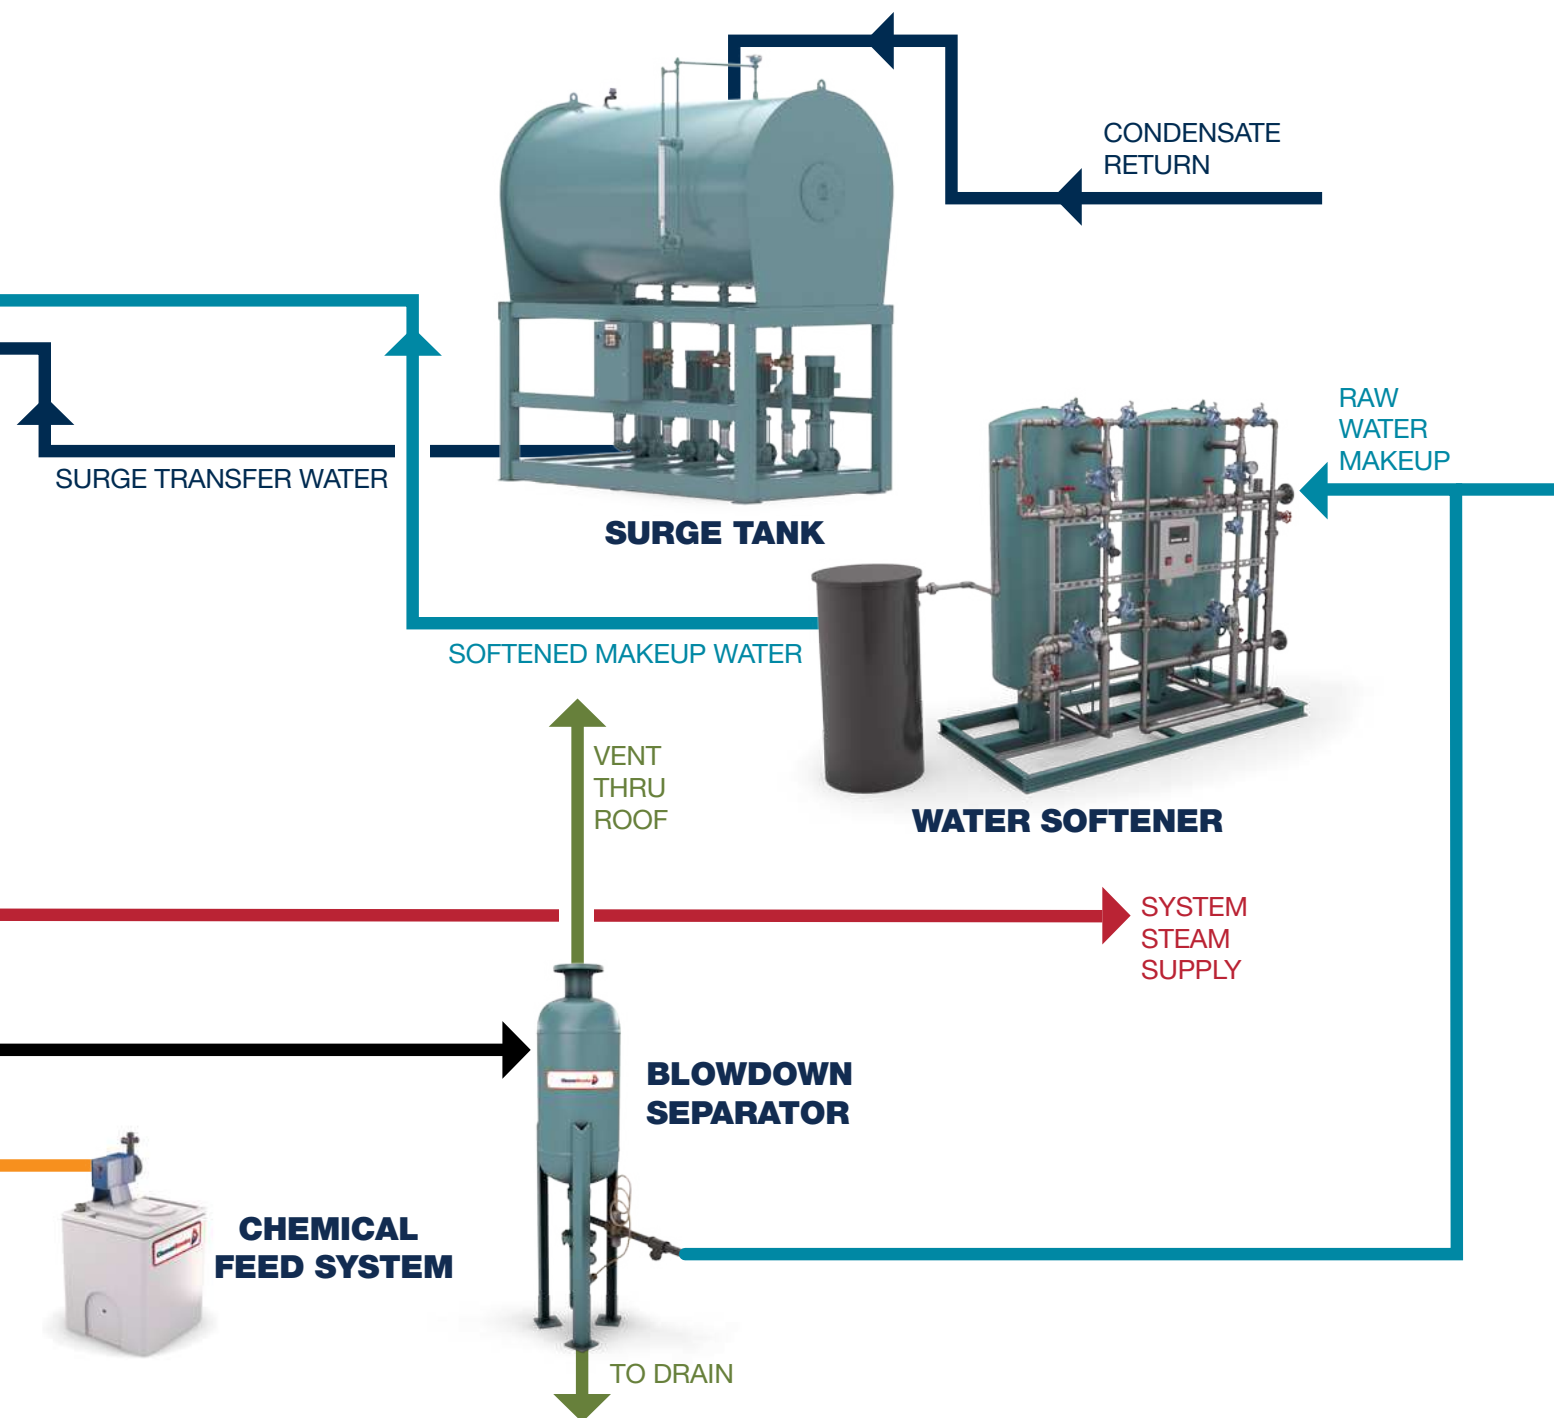

- » Improves overall system efficiency
- » Integrated controls for high-pressure operation

Deaerators

- » Pre-heats boiler feedwater
- » Removes dissolved gases
- » Improves lifespan and efficiency of boilers

Surge Tanks

- » Collects and stores condensate
- » Reduces makeup water and chemical usage

Chemical Feed Systems

- » Chemicals treat the boiler system to maintain peak efficiency and reliability
- » Variety of options available depending on system specifics

Duo Tank Systems

- » Combines spray-type deaerator and surge tank
- » Simplifies installation

Water Softeners

- » Removes minerals that will create scale within boilers
- » Ensures long equipment life

Blowdown Separators and Tanks

- » Cools blowdown water to safe temperature for discharge to drain
- » Required by code for most steam systems

CBLE Dimensions and Ratings

The power of total integration.

The **Power of Total Integration** is how Cleaver-Brooks delivers the world's broadest range of integrated, sustainable boiler plant solutions. In addition to our products, this includes our global representative and service network, training resources, and trusted expertise that add significant value to your Cleaver-Brooks investment.
