

## Mesh Sheet

Our Mesh sheets are made from durable polyester, designed specifically for use in construction environments. The fabric features fine perforations that allow for effective airflow while minimizing the passage of dust and small particles, making it an excellent solution for scaffold covering.

By containing debris and reducing the risk of falling objects, the Mesh Sheet significantly enhances on-site safety for both workers and the public. It is a practical and reliable tools for dust control and hazard mitigation on active construction sites.

### P.J.TEM Mesh sheet Specifications

Material:	High-strength polyester
Dimensions:	1.8 meters (width) X 5.1 meters (length)
Grommet spacing:	Every 30 centimeters

### Features

- Allows airflow
- Block dust and small debris
- Improve site cleanliness and safety
- Ideal for scaffold coverage
